Summary / Profile:

I am a fullstack software developer with over 10 years of experience. My expertise spans frontend and backend development, automated testing, DevOps, and observability.

Throughout my career, I have led teams and provided consulting services. I am adept at using various tools to enhance productivity and ensure the timely delivery of projects. I have also supported my team by reviewing code, coaching team members, and finding solutions.

My goal is to drive team success and deliver high-quality software solutions. I am passionate about learning new technologies and sharing my knowledge with others. I am always looking for opportunities to grow and improve my skills.
